Repeating the operation, the root, more nearly approximated, is WO CHAPTER II. PULVERIZER. 53--64. 1Rule: In the first place, as preparatory to the investigation of the pulverizer, the dividend, divisor, and additive quantity are, if practicable, to be reduced by some number. 5 If the number, by which the dividend and divisor are both measured, do not also measure the additive quantity, the question is an ill put or impossible one. 4 54--55--56. The last remainder, when the dividend and divisor are mutually divided, is their common measure Being divided by that common This is nearly word for word the same with a chapter in the LUdvati on the same subject. (Lil. Ch. 12. ) See there, explanations of the terms. The method here taught is applicable chiefly to the solution of indeterminate problems that produce equations involving more than one...
