paperback. Book Condition: New. Ship out in 2 business day, And Fast shipping, Free Tracking number will be provided after the shipment. Pages Number: 262 Publisher: Chemical Industry Pub. Date :2011-07-01 5th Edition. Li Yuming editor of the chemical instrumentation and automation. is to maintain the basic architecture of the fourth edition. based on its contents in addition to old Tim new. appropriate changes made. This book is divided into 10 chapters. In addition to introduction of industrial production process control system. the basic knowledge. but also introduced the automatic control system constitutes a controlled object. detection devices and sensors. automation instruments and actuators. In the simple. complex control systems. based on the introduction of the new control systems. computer control system. and finally with the production process describes the typical chemical unit operation control program. Chemical Instrumentation and Automation for Chemical Engineering and Technology professionals. also applies to other types (such as oil. medicine. light industry. food. forestry. metallurgy. coal. biology. environment. ) relevant professional colleges and universities. but also Available in continuous production process technology officers. Contents: Introduction The first chapter the basic concepts of automatic control system the main contents of Section II automated

### Reviews

*This book is definitely not straightforward to get started on studying but extremely exciting to read. It is really simplistic but shocks in the 50 percent of the ebook. Once you begin to read the book, it is extremely difficult to leave it before concluding.*

-- **Ally Reichel**

*This publication is amazing. It is definitely basic but shocks in the fifty percent of your publication. You wont feel monotony at anytime of your own time (that's what catalogues are for concerning if you question me).*
